

FACTSHEET GERMANY Import 2023 Q1

Fruit & Vegetable Facts; Jan Kees Boon; +31654687684; fruitvegfacts@gmail.com

In eerste kwartaal sterke terugval Duitse import van Nederlandse groenten en fruit

Vooraf minder kasgroenten; hardfruit deed het goed

In het eerste kwartaal van dit jaar is de import van Nederlandse groenten en fruit weer flink gedaald. Vergeleken met het eerste kwartaal van vorig jaar was het 20% minder en vergeleken met Q1 van 2021 was het zelfs een derde minder. In absolute hoeveelheden komt dat neer op een min van ruim 50.000 ton tov Q1 vorig jaar en een min van meer dan 100.000 ton tov Q1 van 2021.

Vooraf van de grote glasproducten werd er veel minder Nederlands product ingevoerd in Duitsland. De import van Nederlandse tomaten was in het 1^{ste} kwartaal van dit jaar een derde kleiner dan vorig jaar in dezelfde periode en vergeleken met twee jaar terug halveerde de Duitse import van Nederlandse tomaten. Ook de import van Nederlandse komkommers liep fors terug; -30% tov vorig jaar en -40% tov begin 2021. Nederlandse paprika's deden het vorig jaar nog wel goed op de Duitse markt maar in het eerste kwartaal van dit was het een kwart minder.

Ook de import van het in Nederland geteelde opengronds product peen deed het niet denderend. De min in het eerste kwartaal tov van vorig jaar was miniem maar de dalende trend van de Duitse import van Nederlandse peen ging verder. Ook met de Duitse import van Nederlandse prei liep terug. Lichtpuntje was de groei van de Duitse import van Nederlands hardfruit en dan vooral peren.

Import Belgische tomaten praktisch weggefallen

Volgens het SBA viel de import van Belgische tomaten in het 1^{ste} kwartaal praktisch weg. Het ging nog maar om ruim 2.000 ton tegen nog 6.000 vorig jaar en 10.000 ton in Q1 van 2021. Belgische peren deden het in Q1 minder goed na een goed Q1 in 2022. In totaal was de Duitse import van Belgisch product in het eerste kwartaal een kwart kleiner dan in de zelfde periode van de voorgaande 2 jaar.

Germany: Import Fresh fruit and vegetables from the Netherlands (in tons)

Het Duitse CBS (SBA) registreert zoveel mogelijk het land van oorsprong, dus zonder re-export.

Totale Duitse import groenten en fruit in eerste kwartaal met 10% gekrompen

In heel 2022 viel de totale Duitse import van verse groenten en fruit flink terug. Dat betrof toen ook al grote producten als tomaten en komkommers. In het eerste kwartaal is de totale Duitse import van verse groenten en fruit verder gekrompen en wel met 10%.

Overigens is verse groenten en fruit geen uitzondering. De hele Duitse goederen import krimpt. Dat is zo als het om volume gaat. In het eerste kwartaal kromp de totale Duitse goederen import in volume gezien met 10%. Zo gezien is de ontwikkeling van de import van verse groenten en fruit in volume gezien geen uitschieter.

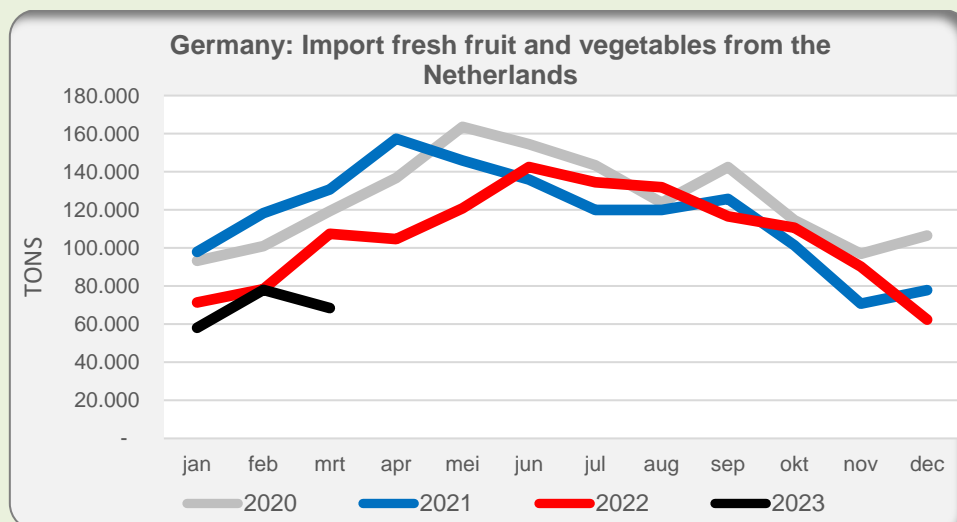

Bij Nederland is het beeld wat anders. Niet als het om de totale goederen import uit Nederland gaat maar wel als het om verse groenten en fruit gaat. De totale Duitse goederenimport import uit Nederland kromp in Q1 met 10% en die van verse groenten en fruit met 20%

Prijzen over de hele linie flink gestegen

In waarde gezien is het beeld wel anders. De totale Duitse goederen import was in Q1 van dit jaar ietsje groter dan vorig jaar en dat gold ook voor de totale import uit Nederland. In waarde gezien bleef ook de totale Duitse import van verse groenten en fruit op peil. Dat kan niet gezegd worden van de import van Nederlandse verse groenten en fruit. De waarde daarvan nam in Q1 met 14% af.

Dit alles betekent de gemiddelde prijs van de Duitse import flink is gestegen. Die van alle goederen in Q1 zelfs met 15%. Import uit Nederland maakte daarop geen uitzondering.

De importprijs van verse groenten fruit was in Q1 in z'n totaliteit gezien 13% hoger. De gemiddelde prijs van Nederlands product was in het eerste kwartaal 8% hoger.

Maart

Vrijwel over de hele linie krimp in Q1 de Duitse import van verse groenten en fruit. Zelfs die van bananen. Daarvan werd in Q1 4% minder in gevoerd. De min bij tomaten was 13% en bij komkommers 10%. Ook werden er Q1 in totaal minder appels (-14%) , sinaasappelen -10%), watermeloen (-6%) en paprika's (-15%) ingevoerd.

Uitzonderingen in Q1 waren druiven (+7%) peren (+1%) ananas (+8%), kiwi's (+10%) en mango's (+28%).

De krimp van de import van Spaans product was in Q1 met 17% ook fors te noemen. Ook uit Italië en Polen werd minder ingevoerd.

Landen van waaruit in Q1 meer werd ingevoerd zijn onder meer>: Zuid Afrika (+11%) , Marokko (+15%) en Griekenland (+56%!).
