PORTUGAL INVESTEERT IN FRUITSECTOR

Productie en export verse fruit groeien

Portugal investeert de laatste flink in vooral de fruitsector. De fruitproductie wisselt wel van jaar-op-jaar maar is gegroeid naar gemiddeld 1,2 miljoen ton in de laatste 3 jaar tegen 0,95 miljoen ton tien jaar terug. Grote producten zijn de groeiers sinaasappelen en appels en krimpproduct (Rocha) peren. Andere groeiproducten zijn: frambozen en blauwe bessen.

Portugal probeert oa. door het aantrekken van buitenlandse investeerders de fruitproductie te stimuleren. Met name in de regio Alqueva waar door een enorm stuwmeer water beschikbaar is voor (gecontroleerde) irrigatie.

2020 was een topjaar voor de productie van groenten. Er werd in totaal 0,94 miljoen ton groenten geproduceerd. Tegen 0,8 miljoen ton in de beide jaren er voor. Daarvoor lag de omvang van de Portugese groenten productie daar vaak tussen in. Tomaten (voor de verse markt) is het belangrijkste product gevolgd door peen, pompoenen, kool, uien, sla en bloemkool/broccoli.

Exportwaarde vers fruit van 780 miljoen euro waarvan 185 miljoen frambozen

De Portugese fruitexport vertegenwoordigde vorig jaar een waarde van 780 miljoen euro en die van verse groenten had een exportwaarde van 185 miljoen euro.

Frambozen was met 185 miljoen euro naar waarde gezien het belangrijkste exportproduct gevolgd door sinaasappelen met 125 miljoen euro. Blauwe bessen was goed voor een exportwaarde van 32 miljoen euro.

Naar hoeveelheid gezien zijn sinaasappelen, peren en appels de belangrijkste

De export van vers fruit is naar hoeveelheid gezien gestegen van nog geen 300.000 ton in 2011 naar ruim 500.000 ton nu. Sinaasappelen, peren en appels zijn in die volgorde de belangrijkste export producten. Na deze fruitproducten volgen tomaten, pompoenen, koolrabi en peen.

De export van Portugese frambozen bleef in 2020 stabiel op ruim 26.000 ton nadat de jaren daarvoor de export flink groeide. Blauwe bessen is ook een groeiproduct maar met 5.400 ton bleef het nog een klein exportproduct.

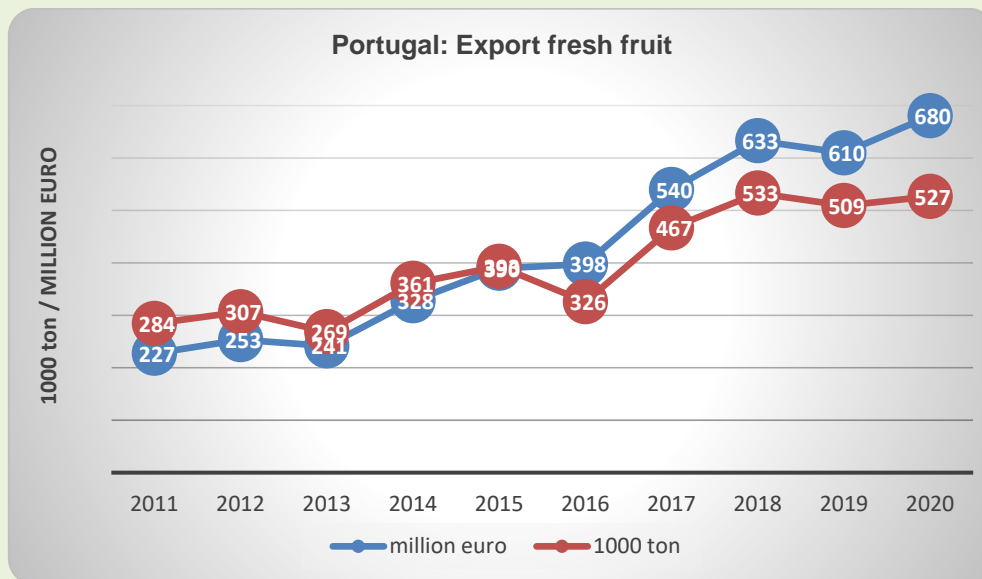

Portugal: Export fresh fruit

	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020

euro/ton	800	826	899	908	990	1.220	1.157	1.187	1.197	1.292

Spanje veruit de belangrijkste afnemer

Spanje is veruit de belangrijkste afnemer van Portugese verse groenten en fruit. Vorig jaar ging het met 417.000 ton om meer dan de helft van het totaal. Opvallend is dat van de beide groeiproducten frambozen en blauwe bessen het meeste naar Nederland gaat. Vorig jaar exporteerde Portugal 8.500 ton frambozen naar Nederland en 2.000 ton blauwe bessen.

De afzet van Portugese peren wijkt ook sterk af van het algemene patroon. Brazilië is de belangrijkste afnemer en dan vooral t/m 2019. In 2020 was Brazilië nog wel de belangrijkste afnemer maar de dominantie was een stuk minder groot. In de eerste maande van dit jaar zijn er ook weer minder Portugese peren naar Brazilië gegaan.

Spanje is ook veruit de belangrijkste leverancier

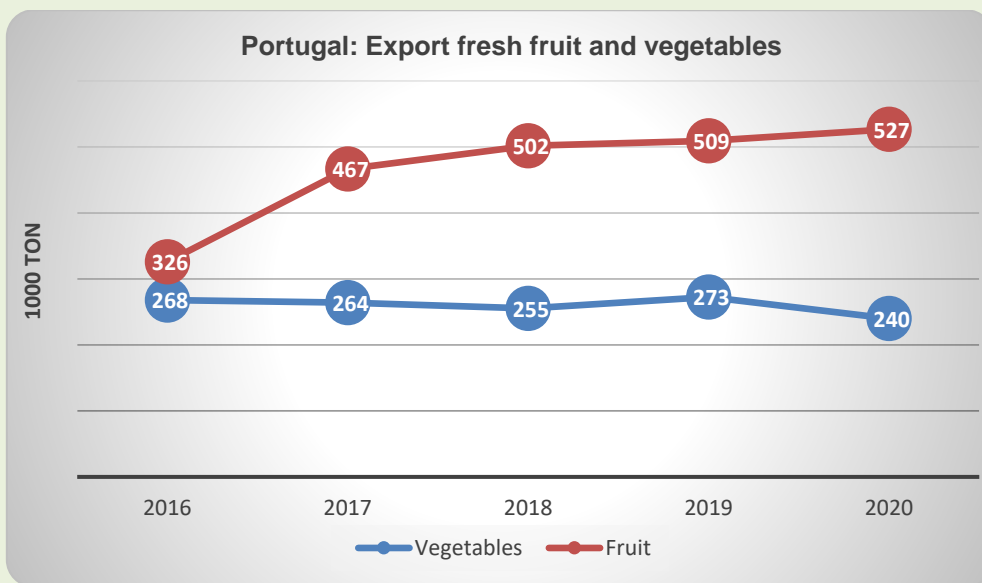

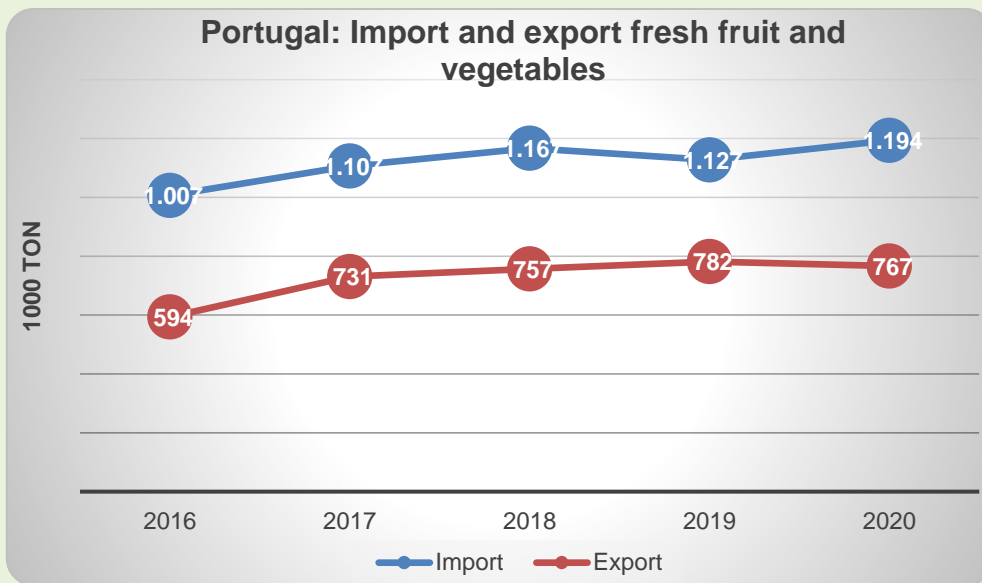

Portugal importeert ook best veel en dan vooral vers fruit. In het afgelopen jaar werd er een recordhoeveelheid van ruim 0.9 miljoen ton vers fruit ingevoerd. In de eerste maanden van dit jaar groeide de import weer met 6%. De Portugese import van verse groenten heeft een omvang van bijna 0,3 miljoen ton.

Bananen is het belangrijkste importproduct; in 2020 ging het om bijna 240.000 ton. Dan volgt sinaasappelen met 165.000 ton. Andere belangrijke import producten zijn: uien (80.00 ton), ananas (58.000 ton), meloenen (55.000), tomaten (46.000), watermeloenen (44.0000, appels (43.000) en mango's (38.000).

Spanje is met afstand de belangrijkste leverancier met in 2020 een hoeveelheid van 720.000 ton ofwel 60% van de totale Portugese import van verse groenten en fruit. Zuid Afrika en Costa Rica zijn de andere belangrijke leveranciers. Dan volgt Columbia en Nederland is de nummer vijf met in het afgelopen jaar een hoeveelheid van ruim 30.000 ton. Via Nederland gaan veel (re-export) mango's naar Portugal.
