

FACTSHEET UNITED STATES import fresh fruit and vegetables first half year 2025

Fruit & Vegetable Facts; Jan Kees Boon; +31654687684; fruitvegfacts@gmail.com

NOG REDELIJK RUSTIG BEELD AMERIKAANSE IMPORT EN EXPORT VERSE GROENTEN EN FRUIT

Wel lagere prijzen

De import van verse groenten en fruit in de Verenigde Staten naar volume heeft in de eerste helft van dit jaar geen grote verschuivingen te zien gegeven. De totale import groeide nog lichtjes (verder) naar 12,2 miljoen ton.

Wat wel opvalt is, is dat de (statistische) waarde van de Amerikaanse import van verse groenten en fruit in het eerste halfjaar met een paar procent is gedaald naar 17,7 miljard euro. Alle voorgaande jaren nam de waarde van de import juist toe tot 33 miljard dollar in het kalenderjaar 2024.

Dat de waarde niet nog verder daalde is vooral toe te schrijven aan de grote stijfging van de waarde van de Amerikaanse import van avocado's, druiven en mango's. Van vrijwel alle andere belangrijke producten daalde waarde soms fors, zoals van tomaten -17%, paprika's -10% en komkommers -10%. Naar leverancier gezien valt vooral de grote daling van de waarde van de import uit Mexico in het oog. Die daalde van 11,4 miljard dollar naar 10,4 miljard dollar in de eerste helft van dit jaar.

Minder uitgevoerd

De Amerikaanse export (excl. re-export) van verse groenten en fruit is in het eerste halfjaar wat gedaald. In volume gezien was dat met 3% en in waarde gezien uitgedrukt in dollars zelfs met 8%. Vooral de waarde van de export naar de belangrijkste afnemers Mexico en Canada liep behoorlijk terug. Ook de bescheiden export naar Nederland liep fors terug. Het gaat hierbij vrijwel uitsluitend om zoete aardappelen.

United States: Import and export fresh fruit and vegetables

Mut	-8%	-6%	-3%

Betrouwbaarheid cijfers niet gegarandeerd

In het eerste halfjaar lijkt het er op dat alle reuring rondom het al of niet instellen van heffingen (nog) beperkte gevolgen gehad heeft. Het is afwachten hoe het verder gaat.

Vooralsnog gaan we er van uit dat de door het Amerikaanse ministerie van Landbouw gepubliceerde cijfers kloppen maar dat is voor de toekomst allerm minst zeker.

De helft van de import uit Mexico

Ruim de helft van alle geïmporteerde verse groenten en fruit kwam in het eerste halfjaar uit Mexico. Omdat Mexico een naar verhouding “duur” assortiment levert was het aandeel naar waarde gezien bijna 60%. Tomaten, paprika's en avocado's zijn de belangrijkste producten die de Verenigde Staten uit Mexico halen. In het eerste halfjaar was de doorsnee prijs van de import uit Mexico maar liefst 7% lager dan in de eerste helft van vorig jaar.

Na Mexico volgen Guatemala, Costa Rica en Ecuador alle drie leveren een gemiddeld “goedkoop” assortiment. Dan volgt noorderbuur Canada. Het importassortiment uit Canada is naar verhouding “duur”. De doorsnee prijs van de import uit Canada was in het eerste halfjaar ook 6% lager dan vorig jaar.

Bananen is het belangrijkste product dat de Verenigde Staten nodig hebben uit het buitenland. Dan volgen tomaten, ananas, paprika's, avocado's en komkommers.

Meeste export naar Canada

Bij de export excl. re-export van de Verenigde Staten is appels het belangrijkste product op enige afstand gevolgd door uien, sinaasappelen, sla, zoete aardappelen en druiven.

Canada is de belangrijkste afnemer op enige afstand gevolgd door Mexico
